

Munich and the TUM

Munich, Bavaria

Munich is known as a cosmopolitan city with a heart. Old traditions are mingled with a modern lifestyle. The monks who founded the city in 1158 bequeathed the art of brewing beer. And still today past times become alive in the many beer gardens. As the capital city of Bavaria, Munich is also a major European cultural centre, offering a large variety of museums, theatres and monuments - including the world-famous Deutsches Museum. Parks, green islands all over the city, let you breathe deeply in the middle of urban bustle. Bavaria is one of the most beautiful regions of Germany - and famous for its fairytale castles.

Technische Universität München

TUM is an entrepreneurial university providing a high research and learning environment. In this context 'Entrepreneurial Spirit' means „to activate the diversity of human talent in a concerted, interactive way“ by encouraging scientific exchange. That is how we create a link between traditional and cosmopolitan culture. The TUM, the venue for the Congress, welcomes you to visit one of Germany's leading universities.

2nd European IAHR Congress

Water infinitely deformable but still limited

27. - 29. June 2012 at TUM in Munich

Department of Hydraulic and Water
Resources Engineering

The Congress

On behalf of IAHR Europe, the LOC is pleased to invite you to participate in a spirited congress at the TUM in Munich, Bavaria (Germany) on June the 27.-29. in 2012.

With our fresh and innovative congress concepts we want to welcome researchers, as well as practitioners. To encourage the exchange of ideas we will provide panel discussions and workshops.

Of overriding importance to us are the young researchers. For them, there will be a series of propositions like:

- Sessions completely run by young researchers
- Events promoting interaction with experienced peer researchers
- Low fees and support with an extra fund for young researchers

The Congress will also provide excellent opportunities for social networking during your stay in Munich. We will plan cultural and social events for the evenings as well as an accompanying persons program.

Supporters:

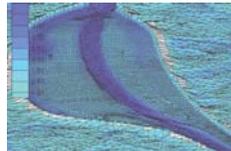

- Federal Ministry of Transport, Building and Urban Development
- DWA – the German association for water, wastewater and waste
- DTK – the German section of ICOLD
- German hydraulics professors

Topics

Water is an infinitely deformable medium. Nevertheless and due to many reasons it is subject to boundaries and limits imposed by physics, humans and ecological constraints. This leads to the following topic:

Water – infinitely deformable but still limited

Physics

- Fundamental research
- Measuring techniques and pure experimental issues

Human Life

- Excess of water, water scarcity
- Energy related topics
- Risk and damage issues
- Coastal engineering

Environment and Ecology

- River morphology
- Hydrology
- Water resources

Politics and Legislation

- EU Water Framework Directive
- EU Flood Directive
- Transboundary issues

Key Dates

Call for papers	01. May 2011
Abstract deadline	31. Aug. 2011
Abstract acceptance	15. Oct. 2011
Paper deadline	15. Jan. 2012
Paper final acceptance	01. Mar. 2012
Early Bird registration ends	15. Mar. 2012
Congress	27. - 29. June 2012

Registration Information

	early bird	regular
Full Delegate Rate	350 €	400 €
Full Delegate Rate IAHR Members	325 €	375 €
Young Scientist / Assistant	225 €	275 €
Student Rate	150 €	250 €

Online registration will be available from January 2012

The registraton fee includes:

- Participation at all congress sessions
- Conference volume with congress abstracts
- Congress papers in digital form
- Catering
- Evening reception

The accompanying persons program will be published in early 2012 on the congress website.
